

March 19, 1976

end from people who had been talked to by the members of the Nebraska Medical Association who would not talk to me. They can't put pressure on me. So I think it ought to be crystal clear what you're adopting when you adopt Senator Schmit's amendment. To my understanding what we're dealing with now as a substitute for 434 is this new sheet that he gave us. We're not talking about what had been previously adopted by the Legislature. The only thing before us now.... We can forget all of those other things that were adopted. We're dealing only with this new paper that's in the book. I think that should be brought to your attention. So before anybody, too loosely, talks about filibusters or wasting time the rest of you can be hustled and told you better vote because the doctors want you to vote without understanding. I'll venture to say some may not have even been aware that what we're doing here is distinct from what had already been done. The only thing you're dealing with is the material in this copy.

Now, with that understanding, I think it's only reasonable for me, because I like to understand what I'm dealing with, to have an explanation of this voluminous group of new amendments.

There are changes of a substantial nature further along in the bill, but you should understand what the meanings of the words are that are being used in this bill. I'm going to give one example to make the point, then I'll sit down. I'm

PRESIDENT: Excuse me. Senator Chambers, I hate to interrupt you but there really is nothing before the floor. You have explained your position.

SENATOR CHAMBERS: Then I'll sit down.

PRESIDENT: Would you stay up to assist the Chair in this regard. You've asked for the division of the question. Could you delineate the extent of your division. For instance, Section 1 contains two paragraphs.

SENATOR CHAMBERS: Well, Mr. Chairman, each Section....

PRESIDENT: You want each Section treated separately unless you notify the floor differently?

SENATOR CHAMBERS: Right. I'm not going to subdivide any of the Sections.

PRESIDENT: Alright.

SENATOR CHAMBERS: Each Section, regardless of how long it is, can be taken as a whole.

PRESIDENT: Will you do the Chair the service of perusing this act to see if maybe we can't propose two or three sections at once, as you go through the act.
